PRIVATE TREATY SALE

We needed a laid back, low cost method to distribute the bulls and private treaty with an opening day seems to be the best fit. There are a couple ways for you to participate.

1. On Saturday December 3, 2016 come look at the cattle and make your selections and then join us at 12:00 MST and you can offer your bid as we proceed through the sale order
2. Come look and select your bulls anytime. Notify us of which lots you are interested in and we will call you when that bull is being sold. You can raise your bid live via telephone.
3. Leave your order with Ann or I, and we will fill it for you.

All bulls will be base priced at \$2500. If two or more are interested in a bull we will raise the bid in \$250 increments until the bull is sold. If you are the only person interested in the bull you may buy him at the base price.

DELIVERY: The first 500 miles is free; remainder at cost.

HEALTH: All bulls will have passed a semen test, be wormed and poured, and non-virgin bulls tested free of trichomoniasis.

GUARANTEE: If you are not satisfied, I am not in business. If you are not satisfied for any reason prior to 11/1/2017 simply return the bull for full credit less \$1000. No questions asked. Example: Purchase bull for \$4000. Bull becomes unsatisfactory at some point. Return bull and receive credit for \$3000 to be used towards a replacement. You must return the bull; mortality is not covered.

Thank you for your interest in our program. It has been three years since we put together a catalog and in that time we fell out of practice and had to rush this one off. Marketing bulls I'm afraid is often an afterthought for me and that makes me especially thankful to those of you who have stuck with us through auctions and private treaty formats with or sometimes without much individual pedigree or performance information.

While our marketing program may have seemed somewhat haphazard; the breeding program has remained disciplined and consistent. The JAD prefix runs deep through the pedigrees of all our cattle. Meaning simply that we have bred cattle that we have firsthand knowledge of. We test these genetics and intensify the good and discard the undesirable and have committed ourselves to the long term proposition of actual genetic improvement through linebreeding and selection.

We've not made matings for marketing purposes; choosing instead to intensify functional characteristics. We've not selected outliers or A.I. sires that represent change, instead we have tried to stabilize a good type and recreate it more often. Breeding cattle this way is our way of serving the commercial cattle industry.

We always look forward to hearing from many of you this time of year. If there is anything I can do to help with your selections, please don't hesitate to contact me.

Pictured here in the early spring of his second year, JAD Phoenix AT12 has grown into a nice bull. He is the product of a half-brother x half-sister mating out of Shoshone Prudence 6157 but beyond that he also combines the beefiness of the Encore/Felix top side of sire and dam with the finesse, femininity, fertility, and milk of the double bred Echo bottom side of the pedigree of sire and dam. It's a complimentary blend and the result is functional range cattle.

Firebrand was injured at the end of his second season. I hope that we DNA several of his calves in the 2016 calf crop. I liked him and his dam Shoshone Prudence 6306 is excellent. She is the mother of some of the best bulls we have identified. JAD LAD S6306, JAD FX T6306, and JAD Fremont Z6306.

A6111 is another half-brother x half-sister bull out of Shoshone Prudence 6157. We continue to line breed 6157 because of the value of her maternal characteristics. A6111 is moderate, balanced and sound. He appeared to be the dominant breeding bull in the pasture in 2016 and we look forward to many more progeny by him.

Ezra is a larger framed, longer made, attractive bull. We have several nice uddered productive young cows out of him and they tend to have their sire's good looks. Ezra is a half-brother to JAD Esterago A3128.

We went back and used Matrix on our heifers. He was one of the best heifer bulls we've ever used. They come easily and grow quickly. The daughters are nice uddered, easy fleshing cows that produce well. I used every drop of Matrix semen that we had so this will be the end of them. We have calves on the ground now out of heifers by JAD Extra US101. He is out of a Matrix daughter.

LOTS 41-50 SELL AS COMMERCIAL BULLS

Females for Sale:

We did not get any females in the catalog but we do have several for sale. The mature cow herd is being wintered on stalks in the Platte Valley but we do have approximately 100 two-year-old cows, 100 bred heifers, and 165 heifer calves at home. Out of these groups I can make packages of registered or commercial females to fill your needs. Just let me know what interest you might have.

On the registered side I do have a 2015 daughter of Shoshone Prudence 6157 by Friars of Wye Umf 7996. She is due to calve to JAD Prudent Prince C986-6157. I also have 3 Registered recipients carrying 6157 embryos and due to calve in the early spring of 2017. Parentage verification via DNA and registration is pending on the 2016 heifer calves but they look very nice. So again, 2nd calf heifers, 1st calf heifers, and heifer calves, registered and commercial, just let me know what you might be interested in.

**JAD Prudence 6115 due to calve 4/5/2017
to JAD Prudent Prince 986-6157**
