## PRIVATE TREATY SALE:

**VIEWING:** Bulls will be located at 215 Pineview. They will be penned for easy viewing from 9:00 – 11:30 MST on Friday Dec. 6. Videos will be linked on the website prior to the opening day.

**SALE:** The opening day sale will be held at the Dawes County Fairgrounds at 1:00 MST on Fri. Dec. 6

**PARTICIPATION:** Three options:

1. Come look through the bulls and make your selections. Then join us at the fairgrounds at 1:00 MST.  
You can offer your bid as we proceed through the sale order.
2. Notify us of which lots you are interested in and we will call you when that bull is being sold. You can bid live via telephone.
3. Leave your order with Ann or I and we will have someone bid in your absence.

All bulls will be base priced at \$2500. If two or more are interested in a bull, we will raise the bid in \$250 increments until the bull is sold. If you are the only person interested in the bull you may buy him at the base price.

Whether you attend in person, are on the phone, or leave your bid; this sale is conducted in a straightforward, transparent manner. Bids are never misused in any way and your trust is of utmost importance to us.

**SEMEN INTEREST:** John & Ann Dockweiler Angus will retain a semen interest on every bull selling.

**DELIVERY:** The first 300 miles is free, remainder at cost.

**HEALTH:** All bulls will have passed a semen test. The 7 non-virgin bulls will be tested free of trichomoniasis.

**GUARANTEE:** The bulls are guaranteed breeders. If they aren't, return them and we will stand behind them 100%. Beyond that we may assist with first breeding season losses on a case by case basis.

**FOOD:** Ann will have coffee and rolls at the bull pens in the morning and will serve lunch at the fairgrounds.

**LIABILITY:** Anyone visiting the ranch does so at their own responsibility and risk, without liability on the part of the owners.

Thank you for your interest in our program. I bought our first bull from the N Bar ranch at Grass Range, MT in 1995. His name was N Bar Extra B310 A144 and he did a great job for us. The most famous bull to come out of that sale was N Bar Shadow. I am nostalgic that 24 years later we are offering a son of Extra and two sons of a full brother to Shadow. A cow's job description never changes so it makes sense that maternal genetics don't need to constantly change either.

As I look back, I can clearly see God's hand guiding and directing in the decisions and choices that had to be made. I had scratched Lot 2 (N Bar Extra) out in my catalog before the sale based on some small thing in his pedigree. But the night before the sale, asking God for wisdom, I knew that he was the bull for me to buy. Proverbs 3:6 says "In all your ways acknowledge Him, and He will make your paths straight." Like the night in 2003 at the hotel in Red Lodge, MT with snow piling up outside the door.

Inside, I was praying for wisdom for the next morning as I would be selecting a group of Shoshone cows. It was in my mind to pick out a pot load of decent cows at a small premium above commercial price. Instead, I ended up with 30 outstanding cows that would change the trajectory of our herd. Shoshone cows like Prudence 6157, Frances 6306, Ester 774, Erica A344, Lucy 2164, Ester 3128, and Ester 731-3199 that continue to have a major influence in our herd today.

We have a useful set of bulls to offer you. At calving I know most of what I need, to decide if a bull calf should be a bull or a steer. I observe his dam; her conformation and her mind, will, and emotions. Potential bulls come from good uddered, sound, feminine cows with outstanding intelligence and mothering ability. Her pedigree is on her tag and in my memory; potential bulls come from cows without major holes or inconsistencies in their ancestry. These criteria along with the calf's individual birthweight lead to the first major cull at branding.

They are developed on pasture when available and grass hay and distillers supplement when it's not. All this is done under the umbrella of linebreeding which I believe is the most powerful selection tool available. Linebreeding increases selection accuracy, creates purity and prepotency, reduces the deception of outcrossed phenotypic superiority, and greatly increases reliability.

When I outcross, I am looking for specific characteristics that I hope will be beneficial to our linebred strain and/or the ability to take a specific product from our linebred cowherd. Give me a call or come for a visit to see the bulls and their mothers.

Thank you,

John Dockweiler

Lot 81: The sire of this bull is owned by Sinclair Cattle Co. and Gene Warzecha of Harvey, ND. He is a full brother to N Bar Shadow. Lot 81's maternal granddam is still here at age 15. His dam is moderate to small, nicely uddered and very nice to be around. She raises good calves and I really like this bull.

Lot 82: The sire is the first bull I ever bought clear back in 1995. I gave \$7,000 for him and had to stop in the first little town on the way home to call my banker and tell him what I had done. I didn't know then that his dam would turn pathfinder with her next calf or that she would go on to be the dam of XP, XXP, Grassmaster, and many others. I used my last 3 straws to flush to Erica S41. We got two bulls and a heifer, lost the heifer tragically preweaning, and I am keeping one bull. Lot 82 was used on JAD Cows.

Here is an Xchanger 7X70 who is the full brother to N Bar Shadow. I mated him to smaller framed, gentle, productive cows which describes 3086 perfectly.

**Invitation:** If you are in Chadron a day early, please join us at Chadron State College for a presentation from North Dakota maternal Angus breeder, Scott Shively. Mr. Shively will present from his life time of successes and disappointments pertaining to all things related to the seedstock cattle industry.

**What:** Farm & Ranch Management class: Professor Ron Bolze

**When:** Thursday Dec. 5th, 2019 from 9:30 – 10:45am MST.

**Where:** Range Unit Teaching Center on the southeast corner of the CSC campus. Room 110 in the Basement.

**Why:** Educational and entertaining.

Ron Bolze & Scott Shively

This bull was used on JAD two-year olds. Unfortunately, he has a small spot in each eye. If he was blind and had three legs I would still be pretty interested, a Shoshone Fenley out of a great cow is not easy to come by. He could possibly be used on heifers, Fenley is borderline and 4088 is pulling birthweight down with 3 at a 91 ratio.

This bull was used on JAD two-year olds. Really nice bull. I have 3 Fenley sons. I used all 3. Two are in the sale and the one I kept is out of 825's granddam. Shoshone Fenley is proudly co-owned with Shoshone Angus and is making outstanding heifers.

I worked for E Bar V Angus for 7 years and knew those cows better than I know my own today. When they dispersed in 2003, I only had enough money for one cow, and I knew just which one I wanted. E Bar V Annie 9224 The granddam of Lot #830. She was a great cow and part of a great cow family.

This is a Phriars son out of the Miss Forever family that originated from Gary Funk. I planned to use this bull on heifers, but he caught his right hind-foot in a panel just before turnout. I will guarantee him to be sound. He's an excellent bull!

This bull's sire, JAD Lad S2164 WS21 is owned by Upright J Ranch. He is doing an excellent job. He calves easy, his calves have some grow, and his daughters are gorgeous, with excellent udders. The bull turned 10 this year and continues to be sound. We are using him A.I. and using sons and grandsons to increase the WS21 influence in our herd. This bull was used on JAD two-year olds and can be used on heifers.

If you're serious about 1100-pound, great cows, and sleep all night calving ease don't overlook Lot 836. He's not big, but he is tightly bred and out of a nice cow. She has a Shoshone Fenley son on her this year that will hopefully be breeding our heifers next year. This bull was used on JAD heifers.
